

Solaris

Award-Winning Platform for Complex Content

COMPLEXITY WITHOUT COMPROMISE

Solaris is the award-winning integrated content platform that enables you to easily publish large, unique and diverse content sets. Solaris delivers the complexity – without compromise, flexing to meet the innovative needs of your business.

TRANSFORMING DISCOVERABILITY AND USABILITY

Solaris delivers an enhanced experience for searching, browsing and reading with built-in semantic capability to enhance your content.

MAKING ONLINE CONTENT WORK HARDER

From tutorials, curriculum mapped content and data visualization, to complex search, integrated taxonomy, video, journal articles, abstracts and more, Solaris delivers the functionality your audience demands.

TAILORED TO YOU

Each Solaris website is designed and built around your specific needs. You'll be in good company. Solaris sites serve in excess of 8 million page views per month with an average page load time of under 500 milliseconds.

Transforming discoverability and usability

Making online content work harder

Tailored to you

Why Solaris?

- Ingest multiple content types including XML (NLM, JATS, DocBook, TEI), PDF, EPUB, MOBI, MS Office files, Images, Audio, Video
- Preview and QA content and publish to live with zero downtime
- Complete control over loading, reviewing and publishing non-scholarly content
- Automated concept and synonym matching, variant and UK/US spellings and suggested results
- Search engine optimization, and related content linking
