Ampere

Workflow Management Platform

Enhance Content Delivery Experience

Ampere lets publishers improve their content delivery experience with relevant branding and marketing with integrated digital asset management, smart navigation, responsive output for content, and a highly intuitive user interface.

Content Tracking

Ampere allows publishers to link the metadata at all stages in the workflow while providing real-time updates of every change at the vendor side. Publishers can have the option to manage publishing content in the platform with version tracking at all stages, view change history and audit reports along with track changes functionality.

Manage Content Cycle

Ampere allows different stakeholders to collaborate under a single system from anywhere for all tasks. It allows manuscript submission by authors followed by peer review, task approvals and reprint orders by authors, setting up task priorities and deadlines, managing files linked with each task, online proofing of content, along with the option of managing role-based permissions of content and metadata.

Ampere is a dynamic cloud-based workflow management platform for all content and media product types that provides operational agility for constantly evolving editorial and production processes in a rapidly changing publishing world.

The platform empowers publishers to track content from creation to delivery. Ampere provides a best-in-class cloud-based content workflow and production platform with the option to customize it according to your specific needs. The platform is trusted by the leading publishers for its workflow and content management platform.

"I'd like to thank you for the efforts of your team for the professionalism and responsiveness throughout this process. It has been very easy to work with you up to this point and I am sure that will continue as the implementation starts. We've been very happy with progress...the app, the big HTML files, the search results by sections—all looking brilliant. Your team is doing a great job. It's all very exciting!"
