BenchPress

Streamlined manuscript submission and tracking

BenchPress simplifies and streamlines the manuscript submissions and tracking process, helping you increase efficiency, decrease costs and dramatically reduce time to publication.

Designed to be easily configured to fit the unique workflows of our publishers, and adapt and flex to the evolving needs of the scholarly community, BenchPress is designed to grow and change as you do.

Single sign-on and a clean and clear interface mean that all stakeholders can enjoy a quick, easy and trackable submission and review process.

Features include drag and drop file upload, integration with production systems, and email templates and scheduled reminders. This makes the submission process easy and intuitive for authors and reviewers, while helping journal staff to manage editorial workloads.

Intelligent admin tools and reporting functionality deliver unrivaled insight to help you realize efficiencies and track progress towards strategic goals.

And as the technology underpinning bioRxiv and medRxiv, BenchPress can integrate easily with other preprint repositories and offers massive scalability. With 10,000+ manuscripts submitted monthly and over 1 million users while maintaining 99.95% uptime, BenchPress offers a reliable service that your users can trust.

"We needed a fast, reliable and scalable system that used a streamlined approach that would allow for thousands of submissions."

Kevin-John Black, Product Lead, Cold Spring Harbor Laboratory Press

Features and benefits

- Configured to fit your unique publishing workflows
- Single publication or a complete publishing program
- Analytics and reporting to track progress through the submissions lifecycle
- Intuitive interface and UX for all stakeholders: authors, editorial, production
- Integrates easily with preprint servers, and provides the technology underpinning both bioRxiv and medRxiv

A submissions solution that's built to fit your workflows

Built around you

BenchPress lets you easily make changes to reflect your editorial practice and peer-review processes, giving you a technology-driven workflow that's optimized to your needs.

Specialized publishing tools

BenchPress is specifically designed with publishers in mind, and offers specialized capabilities including author ORCiD registration, easy APC processing and collection, automated plagiarism screening, advanced reviewer search, and downstream data deposits.

Designed to meet your publishing goals

For low volume publishers with straight-forward submission processes, our simple, out-of-the-box submisssions and tracking process gets you where you need to go fast.

For publishers with more complex needs, we offer a powerful and highly configurable workflow that is built around you – rather than the other way around.

HighWire Press

HighWire is an industry leading provider of digital publishing tools and platform solutions, across all aspects of the publishing lifecycle.
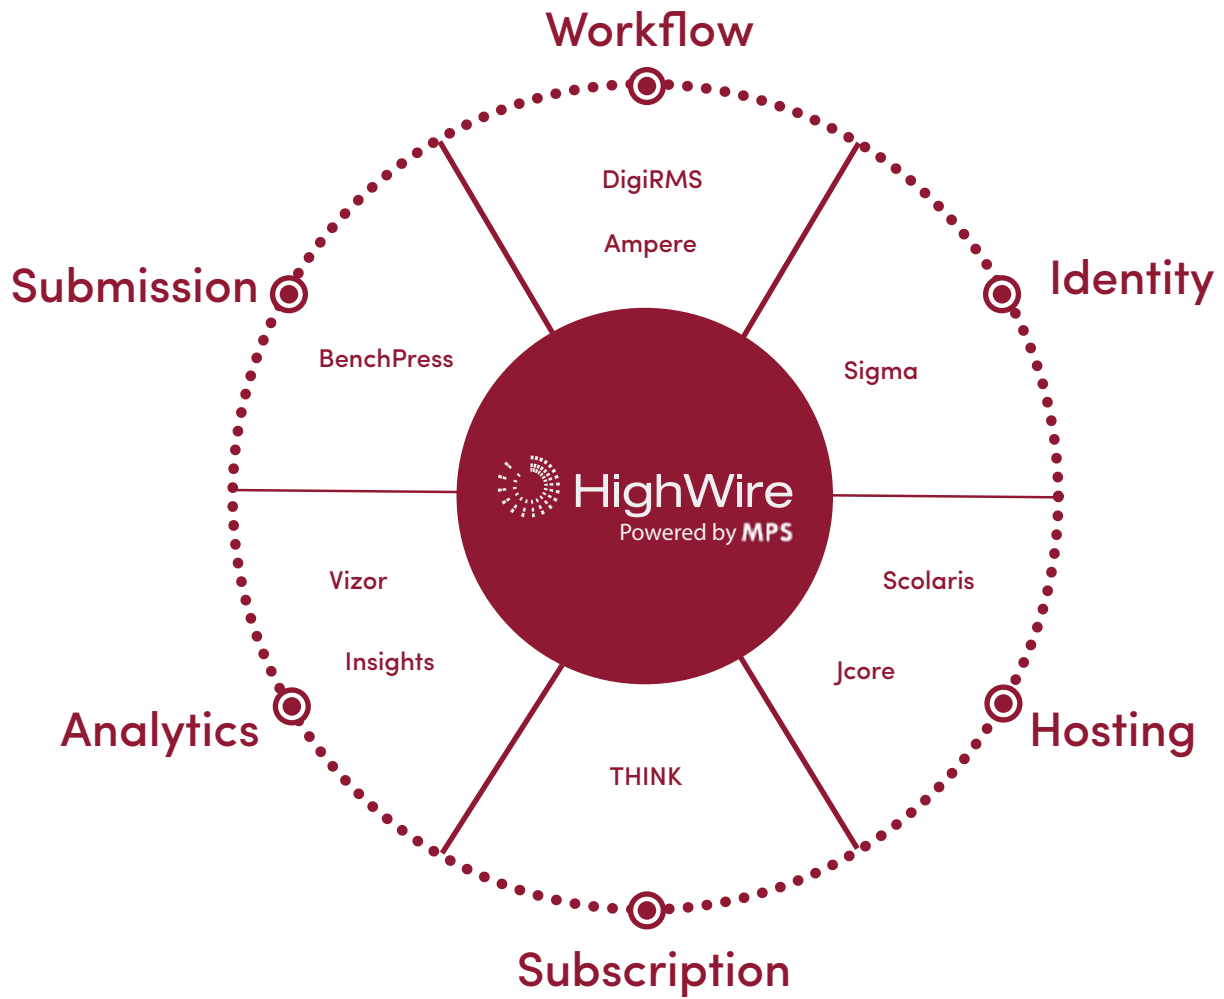

Since our founding at Stanford University in the early days of the web, HighWire has remained an innovative leader focused on the amplification of knowledge. We are now powered by MPS Limited, a leading global technology provider of content platforms and learning solutions.

This combination of deep domain digital and scholarly publishing expertise makes HighWire the technology partner of choice for global commercial and academic publishers.
