Scolaris

Next generation, multicontent hosting for publishers

HighWire
Powered by **MPS**

A content platform that's as unique as you are

Scolaris is a content hosting platform that thinks outside the box, supporting not only books and journals but any content type such as news, videos, case studies, systematic reviews and reference works.

Not only does Scolaris support a full range of content, it also provides a full range of tools to support the publishing lifecycle: from content ingestion, preview and embargo support, publication, alerts, browse, search, taxonomic support, discovery, access control, eCommerce and analytics.

Our industry-leading approach to semantic search and discovery means that all content types are treated as first-rate citizens in your site, and can appear on landing pages, in search results, and in related content widgets. This makes a big difference to internal and external discoverability by surfacing and cross-pollinating your content to the users who will be most interested in it.

This delivers a seamless and intuitive user experience for researchers, practitioners and professionals who need quick access to vital information regardless of source, while opening up access to new revenue streams and audiences for you.

The strength of Scolaris lies in its open, interoperable approach, meaning we can easily integrate third-party systems, standards and technologies. Bringing impressive publishing power straight out of the box, Scolaris also supports extensive configuration to meet your specific needs.

With over 100 third-party integrations to help you enhance, disseminate, analyze and monetize your content, Scolaris can be tailored to deliver a content platform that's as unique as you are.

"We have ambitious plans for future development of the Cochrane Library and these can only be delivered by this move to a new and more flexible platform. With this launch, users will immediately notice a richer experience, but we see this is as merely the start of our journey."

David Tovey, Editor in Chief, Cochrane Library

Features and benefits

- ✓ Full publishing lifecycle support through specialist tools
- ✓ Easy to use self-service tools to give you more control over your sites
- ✓ Display multimedia in-line, in separate tabs, as related content, or in search results
- ✓ Industry-leading discoverability across all content types
- ✓ Open and interoperable, with over 100 existing third-party integrations
- ✓ Integrated with Sigma, our seamless identity and access management solution

Our suite of handy features can be rapidly deployed to meet your specialist publishing needs

Sigma

Sigma is an access and identity authentication system which models institutions and content licenses. Sigma supports comprehensive models of complex hierarchical relationships amongst institutions.

Custom Collection Toolkit

Quickly curate journal articles, books, and multimedia content types into collections complete with their own landing pages.

Direct Publishing

Publish news pieces and other non-article content in real-time, keeping your community up to date with breaking news and tailored information.
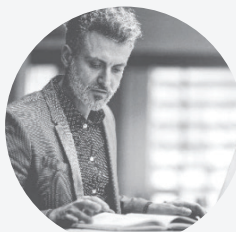

Alerts

Give your readers a heads up when a new article relevant to their interests has been published, while also utilizing alerts as a digital advertising channel to promote selected content to selected audiences.
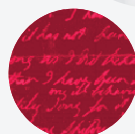

eCommerce

Make it easy for users to seamlessly purchase journals, books, articles, issues and chapters in only a few clicks with our integrated eCommerce and PPV module.

HighWire Press

HighWire is an industry leading provider of digital publishing tools and platform solutions, across all aspects of the publishing lifecycle.
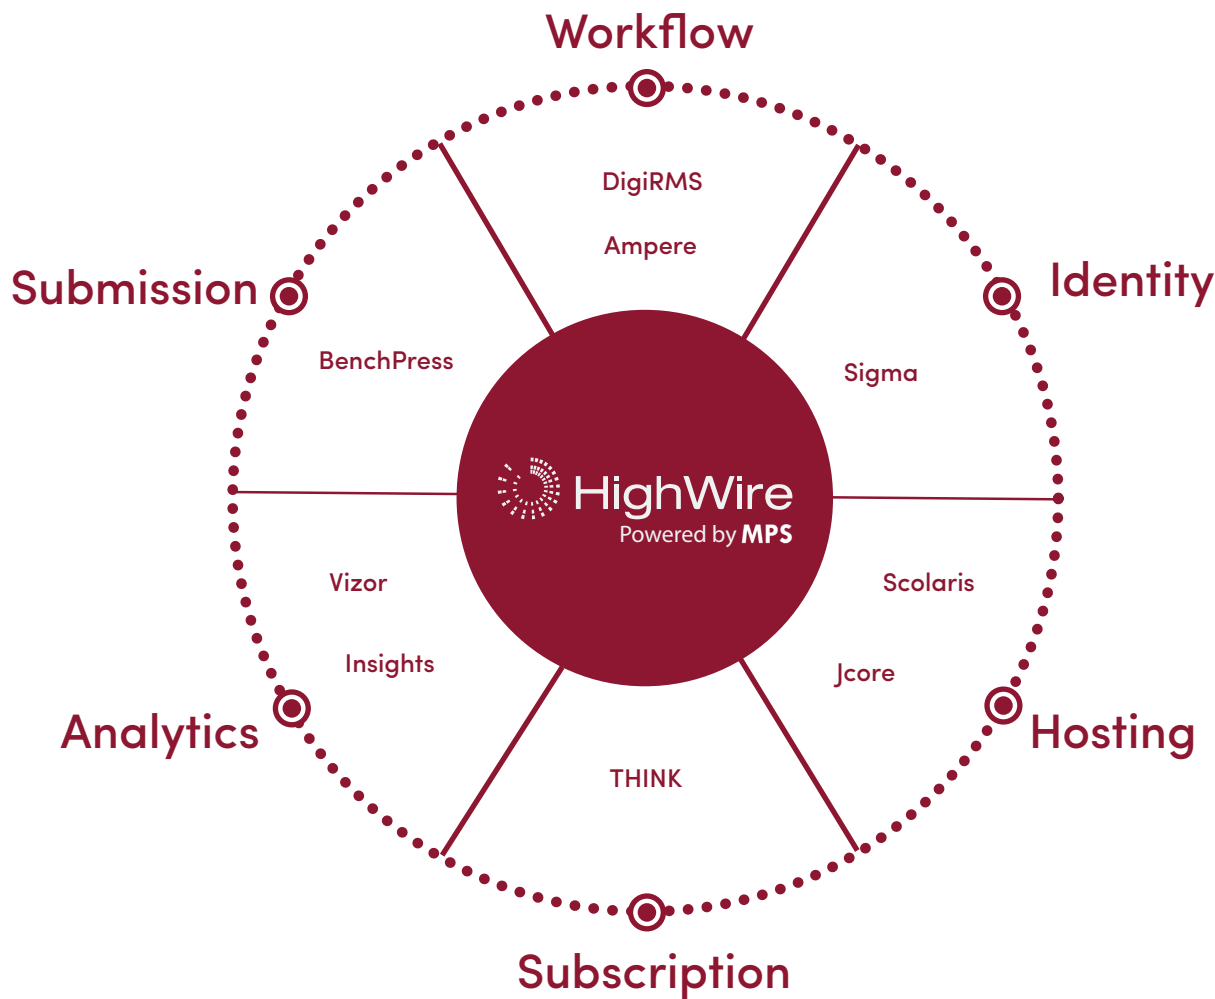

Since our founding at Stanford University in the early days of the web, HighWire has remained an innovative leader focused on the amplification of knowledge. We are now powered by MPS Limited, a leading global technology providerof content platforms and learning solutions.

This combination of deep domain digital and scholarly publishing expertise makes HighWire the technology partner of choice for global commercial and academic publishers.
